Packaging/L3 - Packaging

2017/05/27

# Introduction

# What the heck is spec-cleaner

---

- Package format unifier
- Converter of common typos/bugs
- Currently used by:
  - Python conversions for singlespec
  - Cloud guys
  - Haskell guys
  - Pack team and other contributors

## Interesting features

---

- Conversion to pkgconfig, perl, tex, ... bracketed dependencies
- Optional exclusion using `# nospeccleaner`
- Codeblock detection
- Comprehensive testsuite

## Plans/Bugs

---

- Replace completely `format_spec_file` [github#172](#)
- Allow parsing of the new rpm 4.13 boolean syntax [github#174](#)
- Provide separate option to not include curly brackets
- Cleanup preamble parsing to be more understandable

## How can I help?

---

- Reporting bugs on github
- Using the tool :)
- Expanding testsuite
- Adding more fixes of common issues

## Contact points

---

- <https://github.com/openSUSE/spec-cleaner>
- [tchvatal@suse.com](mailto:tchvatal@suse.com)
