

Manual “Dracula”

THE GAME ITSELF

In DRASCULA you play the role of John Hacker, a British estate agent, who travels to a small village of Transylvania in order to negotiate the sale of some ground of Gibraltar with the Count Dracula. But unfortunately Hacker is not aware of who is Dracula in reality: the most terrible vampire with just one idea on his mind: DOMINATING the World demonstrating that he is even more evil than his brother Vlad.

CONTROL

To control the actions and movements of Hacker you have 3 options at your disposal:

The first consists in moving the cursor to the superior part of the screen until there will be indicated the possible actions you can choose. You only have to click on one action you want Hacker to realize.

The second consists in pressing the right button of the mouse. There will be shown a series of panels or squares in which are - in the superior line - the icons of actions and - in the inferior line - the icons of objects of the inventory. You only have to click on one icon of action you like to realize or on one icon of object you like to use. If you want to realize an action with an object, click first on the icon of action and then on the object.

The third option is using the F1-F8 keys. Each key represents one action:

F1: Look: to find out, what is each object.

F2: Take: to take something.

F3: Open: to open doors and windows.

F4: Close: to close opened objects.

F5: Talk: to talk to different persons.

F6: Move: to move objects.

F7: Restore game

F8: Go To: to move yourself.

F9: Pressing F9, you will activate the panel of sound control. Here you can increase or decrease the volume of the master, the voices and the music. To go back to the game, you only have to press the right button of the mouse.

F10: Save game

T: If you press the T-key, subtitles will be re-enabled

V: If you press the V-key, you only will hear the voices of the persons without subtitles

ESC: If you press the ESC-key during any animation, this animation will be “removed”. If you press it during the game, then you will be asked if you want to exit the game.

IMPORTANT:

If you press SPACE-key while a character is speaking, the sentence will be interrupted (apart from the voice part). Press SPACE-key again to continue. Useful to have more time for reading and understanding subtitles.
