NAME

sdt unpackinitrd - unpacks an initrd image to the given location

SYNOPSIS

sdt unpackinitrd -i *PATH_TO_INITRD_IMAGE* -o *OUTPUTDIR*

DESCRIPTION

Unpacking initrd image

The `unpackinitrd` command will unpack a given initrd image to the destination directory specified.

```
sdt unpackinitrd -i /mnt/boot/loader/x86_64/initrd -o ./initrd
```

If the `OUTPUTDIR` is not specified, the image will be unpacked to `initrd-unpacked` in the current directory.

OPTIONS

-i *PATH_TO_INITRD_IMAGE*, -input *PATH_TO_INITRD_IMAGE*
Path to the initrd image to be unpacked.

-o *OUTPUTDIR*, -output *OUTPUTDIR* Path to the directory to unpack the initrd image.
